

LIFTING TABLE

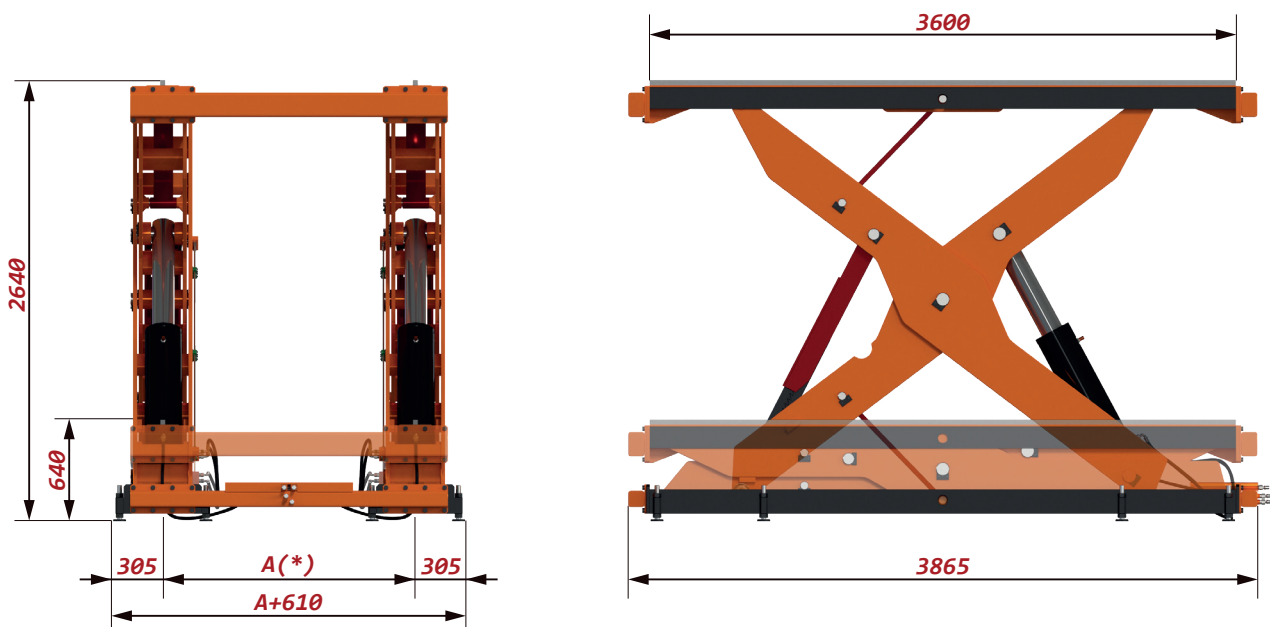

Weight	6000 kg
Lifting Capacity	12 T
Power	15 KW
Max. Lifting Height	2000 mm
Lifting Time	2 min

High performance hydraulic lifting table, suited for cleaning and maintenance tasks of all the production equipment.

- Optimized design in order to reach reduced height in its lower position, offering at the same time a wide range of lifting heights to improve working task on the machinery.
- Independent Hydraulic system, equipped with quick couplings, in order to optimize space requirements.
- Security system, by means of mechanic locking, so the bottom parts of the machinery get easily reachable without risk for the workers.
- Self-centering frame relative to the upper platform, which offers great stability to the lifted equipment.
- Designed both for its installation inside a pit or directly placed on the factory floor.
